1878 I00-11-001 - Order Instituting Investigation into implementation of Assembly Bill 970 regarding the identification of electric transmission and distribution constraints, actions to resolve those constraints, and related matters affecting the reliability of electric supply.**

A01-04-012 - Related matters. This decision considers the economic need of upgrades to Path 15, the major transmission interface between northern and southern California. Based on the record in this proceeding, the Commission finds that the proposed upgrades are not cost-effective to ratepayers. This evaluation considers the project on a "stand-alone" basis--i.e., without considering the participation of PG&E and other entities in the project. The Commission will be examining the proposed ratemaking treatment for project costs, as well as the allocation of project benefits and costs among project participants in further evidentiary hearings. The Commission will also consider at that time any updates to the estimated project costs. The Commission may revisit today's findings if that information changes the project economics significantly.

A02-05-022 - Conference with Legal Counsel – Application for Rehearing

A02-05-025, A.02-05-026, A.02-05-031 - Related matters. Disposes of applications for rehearing by Pacific Gas & Electric Company (PG&E) and San Diego Gas & Electric Company (SDG&E) of D02-11-027. This interim decision established the 2003 rate of return and return on common equity for the above two utilities. Each applicant challenges the adopted return on equity (ROE) granted to it. PG&E contends that the 11.22% ROE adopted in the decision fails to comply with controlling legal precedent, and is arbitrary and capricious in setting its ROE below that adopted for Southern California Edison Co. SDG&E contends that the adopted 10.90% ROE for it fails to contain separate findings on all material issues in violation of Public Utilities Code Sec. 1705, and that it is not supported by the evidence in the record.

2129****R01-10-024 - Conference with Legal Counsel – Application for rehearing**

Disposes of the applications by Southern California Edison (SCE), Pacific Gas & Electric (PG&E), San Diego Gas & Electric Co. (SDG&E), and Sempra Energy Resources for the rehearing of D02-09-053. The decision is an interim opinion in the Commission's rulemaking to establish ratemaking mechanisms and procedures that would enable the utilities to resume responsibility for procuring power for their retail customers. The decision allocates existing California Department of Water Resources long-term contracts to PG&E, SCE and SDG&E.

2150****A01-01-003 - Conference with Legal Counsel – Application for Rehearing**

Disposition of Application for Rehearing of D02-12-053, filed by Santa Clara Valley Transportation Authority (VTA). In January 2001, VTA filed an application for an at-grade crossing for a light rail transit line in the City of Campbell. VTA filed a motion to dismiss this application on the grounds that the Commission's jurisdiction over light rail crossings is limited to regulation of safety appliances and procedures and post-construction safety review, and does not include the location, construction, or separation of light rail crossings of roadways. The Commission denied VTA's motion to dismiss. On December 17, 2002, the Commission in D02-12-053 issued an order denying the application of VTA for an at-grade crossing at Hamilton Avenue in Campbell, County of Santa Clara. Moreover, the Commission found that it has jurisdiction to review and approve the construction and placement of VTA's light rail/street crossing.
